Education

University of Illinois Urbana-Champaign **Fall 2026 (Graduating Dec '26)**

- Bachelor of Science in Information Science

Work Experience

Krafton Inc. (#1 Global AI x Game publisher, Mkt. Cap $11.3B) **Remote**

- *AI Governance Analyst* *Jan* 2026 – *Dec 2026* (Contract)
  - Designed an AI governance operating model defining approval ownership across AI, Legal, Security, and business teams.
  - **Led biweekly AI Safety Committee** meetings since April 2026, coordinating AI adoption and risk reviews across teams.
  - Developed **AI adoption guidelines** covering internal tools, production assets, external IP transfers, and user data.
  - Developed **AI spend review criteria** linking procurement decisions to business value, cost ownership, and adoption scale.
  - Analyzed **2,000+ automation cases across 32 organizations** and built dashboards to guide AI transformation priorities.
  - Designed internal AI software trust criteria covering ownership, maintenance, and deployment readiness.
  - Analyzed **84 agents**, identifying cost attribution gaps affecting **25% of token usage**, and contributed to reducing token expenses.
  - Evaluated **68 AI models** across six workload types to guide model selection and cost-performance tradeoffs.
  - Analyzed AI spend across **3,849 users and 287 products, identifying 611 idle enterprise seats**.
  - Reviewed **829 approval requests** and partnered with engineering on intake, rejection-reason, and Slack UI improvements.
  - Assessed **2,000+ automation cases across 32 organizations and 13 job families**, identifying workflow bottlenecks.
  - Designed AI approval workflows and adoption guidelines defining ownership, review requirements, and escalation paths.
  - Proposed agent access and monitoring controls covering accountability, task costs, retries, and deployment readiness.

Pacvue (#1 Global AI Commerce Media Platform, ~70K brands, ~12% of global retail media spend) **Chicago, Illinois**

- *AI & Customer Intelligence Summer Intern, Office of the CEO* *Jun* 2026 – *Aug 2026*
  - Interviewed VP to C-level executives, prototyped an ENT Operating Agent that auto-generates executive digests for the team.
  - Built the weekly Performance Review report for leadership, tracking the revenue engine across pipeline, bookings, ACV-to-rev, and renewals.
  - Reconciled conflicting metric definitions across Salesforce and Tableau into a single source of truth for GTM executives.
  - Developed the "6 for '26" executive OKR dashboard for Enterprise SLT review, structuring 6 company priorities.

Krafton Inc. (#1 Global AI x Game publisher, Mkt. Cap $11.3B) **Seoul, Gangnam**

- *AI Transformation & Strategy Intern* *Jul* 2024 – *Jul* 2025 (*Full-Time)*
  - Tracked AI adoption across 3,100+ employees and assessed 30–50 use cases across five studios, briefing the CEO.
  - Authored weekly executive AI briefings and benchmarked 40+ governance cases to inform initial AI governance plans.
  - Evaluated 30+ AI solutions, supporting four partnerships with OpenAI, NVIDIA, Microsoft, and ElevenLabs.
  - Built Slack AI automation, trained 50 employees, and hosted biweekly AI showcases attracting 600+ employees.

Action Lab (Prof. Jessie Chin, Action Lab) **Illinois, Urbana**

- *Human-AI-Interaction Research Assistant* Jan 2026 – Current (*Part-Time)*
  - Designing experimental conditions for an **IRB-approved study** examining how LLM-based AI players influence group decision-making.
  - Developing AI player behavior strategies grounded in game theory research to test human responses to mixed-quality information.
  - Evaluated and compared **+10 existing AI models** to identify the most effective options to deploy an AI player.
  - Developed prompt engineering frameworks using **ReAct, chain of thought**, and structured task decomposition.

Watts College of Public Policy (Reports to Endowed Professor Maryann Feldman) **Arizona, Phoenix**

- *Undergraduate Research Assistant (Quantitative & Qualitative Data Analysis)* Sep 2023 – Jul 2024 (*Part-Time)*
  - Conducted literature review and proofread academic publications, supporting **place-based PE, VC** research.
  - Merged **600K+ subsidy tracker data** and analyzed trends through **Python (Colab & Jupyter), R, and Tableau**.
  - Reviewed **1M+ Duke data** for NSF-funded biomedical enterprise research with a team of USC, ASU, and CU scholars.
  - Developed a **MySQL database**, granting external users access to 7 critical datasets for cross-institutional research.

Leadership & Project Experience

Memoria (Policy Information Layer for AI Governance) **Chicago, Illinois**

- *Co-founder (Governance & Consumer)* May 2026 – Current
  - Created PIP positioning around cross-system authority, transaction history, and evidence for financial agent controls.
  - Defined governance requirements for vendor changes, invoice approvals, and payments, including segregation of duties.
  - Established enterprise compliance, security, and operational requirements linking agent controls with audit evidence.

Tradies (AI-driven gamified social platform connecting students in-person) **Arizona, Tempe**

- *Co-founder* Nov 2022 – May 2024
  - **Securing over $50K** in grants to fund Tradies' development, accelerator backed
  - **Led 500+ surveys and 30+ interviews** for primary market research, shaping product-market fit and platform design

Skills & Activities

Skills: SQL, Python, R, MS Excel, Tableau, Power BI, CSS, HTML, Figma, Javascript, Typescript, Databricks, AI solutions (For vibe coding & working)
Activities: MIRA (AI Memory Architecture Project), AI Alignment@UIUC (Editor-in-Chief), 2026 UIST-accepted HCI Poster Paper (AI-assisted decision-making via AI cloning), AgenticAI@UIUC (Active Member), Cozad Venture Challenge (UIUC Entrepreneurship Cohort)
